

A Day in the Life of a GP at Newent Doctors Practice (When Not Seeing Patients)

Even when they're not face-to-face with patients, our GPs are hard at work behind the scenes!

After collecting some data, here's what we found each GP handles in an average day:

 **231** Prescription requests signed

 **51** Results reviewed

 **34** Tasks actioned

 **22** Clinical documents actioned

 **11** Emails sent

 **7** Letters written

Why it matters:

Much of a GP's work supports your care indirectly - making sure test results are reviewed, medications are safe, and other healthcare professionals are informed.

 Thank you for your patience and understanding. We're always working for your health—even when you don't see us!
